

# Garage Door Preventative Maintenance Inspection

Regular maintenance before problems occur can significantly reduce your overall maintenance costs.

Your garage door is the largest moving part in your home and is typically used every day. Over time, parts can wear and break creating potential safety problems. An annual visit from the professionals at Alliance Garage Doors & Openers can keep your garage door operating safely and smoothly for a long time.

Schedule regular garage door inspections every year. Alliance Garage Doors & Openers' professionals will:

- Inspect the entire garage door system.
- Tighten and inspect all garage door hardware.
- Oil and lubricate all moving parts; such as hinges, rollers, springs, pulleys.
- Check bottom weatherseal.
- Check sides and top outside weatherseal to make sure your garage door is properly sealed.
- Check the garage door spring tension to make sure the springs are adjusted and the garage door is properly balanced.
- Check garage door cables and garage door springs for any damage or wear.
- Verify the operation of all safety features.
