

C.H.I. Commercial Garage Door Micro-Grooved Model 3212

Model 3212 -- Thermally-broken Insulated, Steel Back

Construction

- Sections are 2" thick.
- Double-sided steel doors are heavy 20-gauge front and 27-gauge back for sturdiness.
- Outside skin features horizontal micro-grooves.
- Concealed steel back-up plates run from top to bottom of each section for secure hardware attachment.
- Tracks (2" or 3") available in bracket mount, angle mount, clip angle mount, 12" radius, 15" radius, high lift, vertical lift, roof pitch or dual track low headroom.
- Torsion springs are helically wound with stress-relieved, oil-tempered wire.
- Springs are individually calibrated for each door.
- Torsion shafts are galvanized for rust resistance.
- Bottom "U" type astragal is a standard feature.

Insulation

- Sections include a thermal break to eliminate thermal convection.
- Foamed in-place polyurethane core.
- Insulating R-Value of 17.54
