

C.H.I. Commercial Garage Door Full-Vision Aluminum Model 3295

Model 3295 -- Aluminum Full View

Construction

- Clear anodized aluminum or white sections are 2" thick and assembled with through bolts at each vertical stile location.
- Section joints are tongue-and-groove for a superior weatherseal.
- Glass is installed with a flexible rubber gasket around all edges.
- Insulated and 1/4" tempered glass is available in some sizes.
- Aluminum panels can be substituted for glass panels.
- Glass or aluminum panels can be easily replaced by removing an inside vinyl retainer.
- Tracks (2" or 3") available in bracket mount, clip angle mount, 12" radius, 15" radius, high lift, vertical lift, roof pitch or dual track low headroom.
- Torsion springs are helically wound with stress-relieved, oil-tempered wire.
- Springs are individually calibrated for each door.
- Counter-balance torsion shafts are galvanized for rust resistance.
- High-cycle spring options may be specified.

- Bottom "U" type astragal is a standard feature.
